

## New Campus Update 3.7.18

Our Board and Administration continues to work on preparing for our school's move to the Natural Bridges campus, from researching healthy learning environments to discussing safety infrastructure and procedures. Here are some quick updates on our most recent steps in the process.

- Barry Swenson Builders will be serving as our general contractor.
- Peter Spellman, parent and Trustee, has agreed to be our architect for the project.
- SC City Schools has selected a contractor for the re-roofing project and is waiting for approval from the Department of State Architect.
- We'll be installing solar tubes in one of the classrooms as a pilot/demo project to design our daylighting solution.
- We've developed a priority list and budget for our new Life Lab.
- We've gathered student feedback on what they'd like to see on the playground, and are beginning to talk with vendors about appropriate play structures and elements.

### **Matching Grant for New Furniture at the New Campus**

Don't forget that this year's Fund-A-Need (paddle raise at the auction) for our Innovative Furniture Campaign will benefit from a \$25,000 matching grant from the Monterey Community Foundation!
